Class Name: Totnes

Term : Spring 2

What we have been learning

Some photos of our creative work this half term.

It's the Easter Holidays! Isn't that eggs-cellent?

This half term has been a short but fun one. We have been very busy continuing our journey through space and have enjoyed taking a hands on approach in all areas of the curriculum.

In maths, we have been looking at measures and comparing different units of measurement in mass and length. We were very shocked to find out just how much sugar was in a variety of foods and could not believe how long 1km was!

In art, we have been making our very own ModRoc aliens and they look absolutely fantastic.

During Science week, we joined Chillingham class to investigate chemical reactions by making active volcanoes. We enjoyed experimenting which chemicals had the biggest reactions and took lots of photos.

We also investigated how craters were made on moon by learning about forces using flour and stones.

We thoroughly enjoyed world book day and it was lovely to see so many staff and children dressed up.

We have finished the term with a week full of delightful treats including a fry up and the most amazing three tier strawberries and cream cake. The staff here in Totnes class are very pleased with the team work that has been displayed by the students and would like to wish them a very relaxing but not too indulgent Easter break.
