Class Name: Dover Term : Spring Term 2 2018

What we have been learning:

As we approach Easter we can reflect back on all the wonderful things we have done and learned about this term.

In inclusion we have continued to work with Tiverton to make our rocket. The final rocket was fitted with a microwave, toilet and shower. All of which were made by us!!! We had great fun sitting inside it and looking up at the stars.

For Science we also took a trip to the Tim Peake Museum and got to dress like an astronaut and find out more about his life. We also did an extra activity for Science week which involved using newspaper to build the strongest bridge. We tested the bridge using eggs to see how many it could hold. The strongest bridge held 25 eggs before things got a little messy!!

In P.E we have been playing target games and perfecting our archery skills. It has been great fun and we got to do it with Pendragon class too. We are looking forward to doing this again during our activity week in May.

In maths we have been working on statistics and sorting and presenting data. We worked really hard at understanding and creating Venn Diagrams.

We are all looking forward to a restful break over Easter after such a busy term.

Dates to remember –

Start of Summer 1: Monday 16th April

Activity Week: W/C May 14th

Some photos of our learning
