Class Name: Cardiff Term : Autumn Term 1 2020

What we have been learning:

We have had an amazing start to our new year. We have spent a lot of time outside, either in our outside discovery area or in the large playground, with pupils learning to do new things such as walking along the wobbly bridge or climbing across the wooden stepping stones.

We have spent time exploring food items during our cooking, food play and sensory sessions. We are all learning to tolerate new foods and even begin to smell, touch and lick the items. We even made fruit kebabs.

We have begun Attention Autism sessions (Bucket sessions) and these have become a highlight of everyone's week.

The whole Cardiff Team have been delighted with how well the children's communication has been developing we have had so many magic moments it has been wonderful.

Magic Moments

Benjamin has loved getting to know Meg and it has been wonderful to watch them playing and laughing together.

Bobby has been incredible using his PECs book to request bubbles and pictures of characters from In The Night Garden or Peppa Pig.

Takheel has been fantastic using his words to name animals from our Little Red Hen story and asking for the swing.

Matthew has been talking lots to staff and his friends. He has been telling us how he feels brilliantly.

Vishnu has settled in brilliantly and we are really proud of how you use symbols to show us what you want to do. It has been wonderful to watch you in the sensory room.

Marley has also been incredible using his PECs book to request items and has even learnt to carry it with him to different rooms.

William has been a super star, playing with his friends and working really hard in everything he's done.

Henry has been a star at exploring a whole range of new foods and putting them to his lips and even biting some. Fantastic!

George has settled brilliantly too and we have all loved how enthusiastic you are with everything you do.

Well done everyone! We are all very proud of you.
