

Communication

**A Voice
Making Choices**

**Listening
Interacting**

**Working together
Relationships**

At The Castle School we want our students to:

- Find their voice. To see the power of communication, initially with adults and also with peers. That they can share things with others that will allow them to get their needs met. To learn to speak out for things that are important to them.
- Make choices. To show others what they want and learn that they can have an impact on their immediate environment, their home life and also the wider community.
- Learn to interact with others and use their communication skills to develop relationships with others.
- Learn to listen to those around them.
