

Creativity

**Risk Taking
Problem Solving**

Play and Leisure

**Opportunity to
make a mark**

At The Castle School we want our students to:

- Develop their play and leisure skills to equip them for their lifelong journey into adulthood.
- To make a mark on the world in their own individual way and to develop their own originality as a person.
- To learn to take risks within the safety of the school environment. To look for possibility within their learning and an awareness that sometimes things are still within their reach. To learn to deal with uncertainty, initially safely within the school but taking these skills out into the wider community.
- To develop resourcefulness when solving problems and to develop their thinking more flexibly to work through different ways of looking at things.
