Cause and Effect

Ambition
Questioning

Thirst and Desire
Finding out

At The Castle School we want our students to:

- Develop their thinking skills and see themselves as a learner. We want them to learn, practice and develop these skills throughout their school life and to develop strategies to support their learning.
- Develop a thirst and a desire for learning, to want to know more and understand things, to be inquisitive about their world. To explore in the safety of the school and staff around them.
- Ask questions, sometimes delving deeper if they aren't sure of the first answer.
- To understand cause and effect and the impact that their can have both on their own environment and also the wider world.
- Be ambitious and realise that they can have an impact on the world around them.
