Class Name: Totnes

Term : Spring 1

What we have been learning

Some photos of our fantastic work this half term.

Wow! We have had a very busy start to 2019 in Totnes Class. All of the students settled back in to school after the Christmas break fantastically and we have managed to do so much.

This term, we have been very fortunate to have been given the opportunity to take part in some Design and Technology lessons. Every Tuesday afternoon, we have gone to Kennet School and been taught by Mr G in his workshop. We have been working very hard and having lots of fun trying to build a small, motorised car. It has been great because all of the students have had a lot of practice at skills that they may not necessary get the chance to do at school. They have been sawing wood, learning how to use a drill effectively, knowing the importance of filing down a piece of wood and many other useful skills!! We are all very thankful to Mr G and Kennet School offering us this opportunity.

As well attending these extra special Design and Technology lessons, the students have continued to put in lots of effort towards their Maths and English. In Maths, we have been honing our Multiplication and Division skills and we have explored when this is useful outside of school. We found that multiplying and dividing happens a lot of the time and we don't even realise it!

In English, we have continued to work on writing in a functional manner. All of the students have worked on letter writing and how to write in a formal style – something very important to do when leaving school.

Again, I would like to say how brilliant all of Totnes have been this term and thank you to all of the parent/carers for your ongoing support.
