

Classroom News

Class Name: Oxford Term : Spring Term 1 2019

What we have been learning:

We have started a new topic 'On the move' and we have been focusing on cars within our lessons.

Maths

We have been learning to use a range of different methods to solve addition, subtraction, multiplication and division questions. We have also been using our new skills to solve problems set in real life, car related, situations.

English

In English we really enjoyed designing, describing and advertising new cars and wheelchairs for Johnny English. We all created some amazing gadgets to include in our vehicles and learnt how to use persuasive language to advertise them. We also learnt to write letters and posted them to our family and friends.

Science

We have completed a lot of investigations relating to vehicles including how far toys cars travel down a ramp. We particularly enjoyed exploring how effective different materials were at being brake pads for bike wheels and designing parachutes to achieve the greatest air resistance.

Foodwise and Small Steps

We have been developing our independence skills. We have been practising making cups of tea and coffee as well as making beans on toast and sponges and cupcakes.

Magic Moments

Laura started a work experience placement at Waitrose. She is loving it and working very hard. Dan continues to be amazing in his piano lessons. His rendition of 'When the saints' was incredible! Ethan has worked very hard using tens and units blocks to add and subtract large numbers! Madison and Andrew have been amazing using Numicon to solve all type of calculations in Maths including multiplication. Madison has also been incredible on the scooter boards! Danny, Vicky and Becky have been so kind and considerate to other people across the school. You are certainly amazing ambassadors for Oxford Class.

Date to remember –

Back to school Monday 25th February
