Class Name: Winchester

Term: Summer 2

Term 6 2023-2024

What we have been doing this term:

Some photos of us!

Winchester have worked very hard this term. It has been wonderful to join the rest of the school, friends and family at Castle Fest and Bandstand. We can't believe it's been a year since the last! We've also been super lucky to welcome our fantastic new D&T teacher, B. Students have loved getting to know B, working together to design their own aprons ahead of future project works.

In English, we have continued exploring non-fiction texts. We have used our analysis of different text features and structures to plan our own narrative and expository essays.

In maths, we have taken our ratio and proportion knowledge into learning about direct and inverse proportion. We have also revised our understanding of factors, multiples and division and multiplication skills.

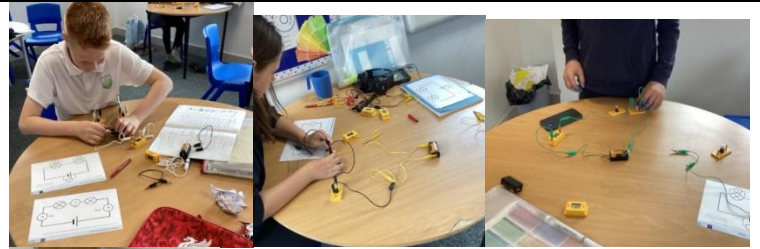

In science, we have begun learning about electrical circuits, current and voltage. We have enjoyed using the equipment to explore how different circuit arrangements impact the readings on an ammeter and voltmeter.

In PSHE and RSE, we have focussed on friendships, values, expectations and boundaries. We have had many insightful conversations about conflict, control and considering others' views.

We have made many yummy delights in food tech this term, including: cookies, pizza, soup and fruit salad. Our cooking skills really have developed this year!

Offsite, we have had a great time learning how to sail. Students have thrived in their independent resilience – it's been a pleasure to see.

For now, this Winchester era has come to an end. It has been a privilege to be a part of the journey. We wish you all a happy, safe and memorable summer holiday.
Alicia, Lauren P, Lorna and Jess

Dates & Points to remember:

Last day of term: Wednesday 24th July

First day back: Thursday 5th September
